

ACHREF BEN ABDALLAH

SOFTWARE ENGINEER | FULL-STACK DEVELOPER

achrefbenabdallah1@gmail.com | +216 25 198 540 | linkedin.com/in/achref-ben-abdallah | Tunis, Tunisia — Open to relocation (France, Germany, Qatar, Saudi Arabia)

PROFILE

Full-stack Software Engineer with 2+ years of experience designing and building scalable web and mobile applications across e-commerce, logistics, and healthcare domains (Angular, Spring Boot, Node.js). Recently expanded into technical project leadership, directing a 15-person delivery team from architecture through launch. Now seeking an international opportunity to bring hands-on full-stack expertise and delivery ownership to a new market.

CORE SKILLS

Languages: Java, JavaScript/TypeScript, Python, PHP, C#, HTML5, CSS3	Cloud: AWS, Azure
Backend: Spring Boot, Node.js, Symfony	Agile: Scrum, Kanban
Frontend: Angular (v16), KnockoutJS, Ionic	CI/CD & Testing: Jenkins, Playwright
Mobile: Android	Code Quality: SonarQube, SonarLint
Databases: MySQL, PostgreSQL, MongoDB	Versioning: Git, GitHub, TortoiseHG

PROFESSIONAL EXPERIENCE

Software Engineer & Technical Project Lead — Dawema, Tunisia

Oct 2025 – Present

E-commerce platform empowering vendors with marketing & delivery solutions.

- Directed end-to-end technical delivery of the platform, leading a cross-functional team of 15 engineers and specialists from architecture through deployment.
- Aligned the technical roadmap with business priorities, contributing to a 22% increase in platform sales in a competitive digital environment.
- Ensured all project milestones were met on schedule through structured Agile/Scrum delivery practices.

Full-Stack Developer — L-Mobile, Tunisia

Jun 2023 – Mar 2025

L-Mobile specializes in digitizing logistics and production processes.

- Optimized data mapping, ensuring 20% faster and more reliable information retrieval.
- Developed Angular (v16) and KnockoutJS components, enabling efficient data consumption through effective event handling and improving application responsiveness by 25%.
- Documented new features, reducing the onboarding time for junior developers by 30%.
- Conducted code reviews, achieving a 15% reduction in production bugs.

Environment: Angular (v16), Node.js, KnockoutJS, C#, Visual Studio 2022, Visual Studio Code, TortoiseHG, IIS, MSSQL Server, SonarQube

Professional Development — Job Search & Certifications

Mar 2025 – Oct 2025

- Completed targeted certifications in Angular and JavaScript while conducting an active job search (see Certifications).

PROJECTS

Synexio — Germany

Sep 2022 – Feb 2023

Cloud solution for real-time visualization of production plans.

- Optimized real-time visualization of production plans, reducing data consultation time by 30%.
- Improved application performance by optimizing UI/UX components, increasing interface responsiveness by 25%.
- Created and executed test scenarios using Playwright, ensuring reliability and stability of the application.

Environment: Angular, Playwright, JavaScript, TypeScript, Azure, Cumulocity, Azure Pipelines, Git

CliniSeven — Tunisia

Jun 2021 – Aug 2021

Development of a clinical management web application.

- Designed and prototyped user interfaces with Figma, reducing user feedback issues on UX/UI by 20% with intuitive mockups.
- Developed APIs with Spring Boot, improving clinical data management and reducing API response times by 30%.

- Ensured code quality with SonarQube and SonarLint, achieving 90% test coverage and reducing production bugs by 25%.

Environment: Java, Angular, Spring Boot, SonarQube, Figma

TomorrowChamp — Tunisia

May 2021 – Jun 2021

Web application promoting interaction between football players and recruiters.

- Developed the backend with Spring Boot and the frontend with Angular, ensuring a robust and scalable architecture, leading to a 25% increase in application performance.
- Implemented CI/CD with Jenkins, reducing production time by 30%.

Environment: Java, Angular, Spring Boot, SonarQube, Jenkins, Git

Dhayefni — Tunisia

Oct 2020 – Dec 2020

Web application for hotel booking management.

- Developed the backend with Symfony, ensuring a secure and high-performance architecture, which reduced transaction errors by 15%.
- Created a responsive user interface with native JavaScript, HTML, and CSS, leading to a 25% increase in mobile conversion rate.
- Optimized performance with MySQL and Apache, achieving a 30% average reduction in page response times.

Environment: Symfony (v3.4), JavaScript, HTML, CSS, MySQL, Apache, Git

EDUCATION

Software Engineering and Information Systems — TekUp University, Tunis (09/2022)

Applied License in Information Technology — Institut Supérieur des Études Technologiques de Nabeul, Tunis (05/2019)

CERTIFICATIONS

Angular — Sololearn, March 2025 (Verify: CC-7D4VKP23)

JavaScript — Alison, April 2025 (Verify: 1434-48235625)
